

Value Proposition

Infrared Inspections & Technologies

“Accurate Infrared Inspections Delivering Unprecedented Predictive Maintenance Solutions for Mechanical Equipment.”

IIT has developed unprecedented predictive maintenance solutions on mechanical systems in the mining and quarrying industries by combining cutting edge infrared technology, customised analytics and trending software, stringent repeatable procedural inspections and experienced, trained mechanical tradespeople. We save our clients millions of dollars each year by consistent, early fault identification.

- Unprecedented savings consistently delivered.
- Safe, effective, repeatable procedures.
- Effective yet simplistic trending software.
